OBJECTIVE

Software Engineer with 3 years of experience looking for new part-time opportunities based out of Milan, Italy

EXPERIENCE

Full-stack Developer

Arup

06/2017 – Ongoing San Francisco, CA

- Developed multiple bespoke web applications for internal and external clients across engineering, commercial, government, and education sectors
- Created, designed, and deployed apps using agile practices for constant improvements to meet milestones
- Lead developer on application that was granted the company-wide "Digital Transformation Award" in 2018

Retail Manager

Apple

04/2006 – 04/2016 Pleasanton, CA

- Led teams of 30 to drive annual sales from \$15M-30M
- Three-time ovation award winner for customer satisfaction in sales, training and repairs

SKILLS

EDUCATION

Advanced Software Engineering Immersive Program

Hack Reactor

12/2016 San Francisco, CA

B.A. in Photography

California State University, East Bay

05/2012 Hayward, CA

SELECTED PROJECTS

RISKi

Lead Developer @ Arup

RISKi implements probabilistic building risk assessment to estimate financial loss and downtime due to earthquakes or floods

- Built multi-tenanting solution to allow project and user level permissions for SaaS distribution
- Implemented highly scalable micro services by dockerizing four risk calculation APIs to cut down on cost and allow APIs to be accessible by other applications
- Created database viewer and editor using a REST API and front-end to enable users to seamlessly create their own building risk models

Portfolio Risk App

Lead Developer @ Arup

The Portfolio Risk App visualizes natural hazard risk across a building portfolio and creates a single source of truth for asset data

- Created single page application using Angular to visualize complete datasets for engineers to communicate risk to stakeholders
- Deployed serverless architecture for consistent, highly scalable environment for maintainability and quick releases of bespoke versions for individual asset-holding clients
- Designed document-based schemas with MongoDB for rapid implementation and iteration

PI Dashboard

Front-end Developer @ Arup

The PI Dashboard served as a living repository to facilitate airport construction management

- Refactored entire existing app with Redux to improve data flow and state management
- Implemented several UI improvements based on user feedback
- Created modular front-end components with React for re-usability
- Optimized navigation with React Router for consistent URL to page behavior

SVS Map

Lead Developer @ Arup

The SVS Map served as a design and analysis communication tool to inform a new mix-used development

- Built custom Mapbox layer with three.js to load 3D models so architects could get a better perspective of how proposed buildings would change the comfort, wind, and temperature in the surrounding environment
- Optimized large dataset to decrease page load times
