Summary

Full-Stack Engineer with over 6 years of experience with expertise using TypeScript, React, and Node.js. Specialized in high-performance fintech applications, driving engineering standards and scalable component architectures to ensure security, reliability, and performance. Experienced in Agile environments, direct stakeholder collaboration, and providing reliable on-call support. An Italian citizen and new Zurich resident, available to contribute immediately.

Experience

Software Engineer, Klarna – Milan, Italy

Dec 2022 – May 2026

- Built and optimized responsive user interfaces for both mobile platforms and web using React Native and React, delivering a high-performance experience for over 100 million daily active users.
- Maintained and improved core internal libraries and frameworks, optimizing shared components to enhance the stability and overall performance of the user interface.
- Designed, implemented, and maintained microservices using an event-based architecture to handle complex disputes and returns processes, ensuring data consistency and reliability.
- Collaborated closely with multiple stakeholders to translate complex fintech requirements into technical specifications.
- Led performance testing initiatives in preparation for the holiday season, utilizing historical data and traffic simulations to ensure system stability under peak load.
- Served on an on-call rotation, diagnosing and resolving critical production incidents to maintain system availability.
- Enhanced deployment reliability by developing Bash scripts for containerization workflows, automating the build and distribution of Docker images to comply with security standards.

Full-Stack Developer, Arup – San Francisco, CA, USA

June 2017 – Sept 2020

- Developed multiple bespoke web applications for internal and external clients across engineering, commercial, government, and education sectors.
- Created, designed, and deployed apps using agile practices for constant improvements to meet milestones.
- Architected robust front-end components with TypeScript, leveraging advanced types and interfaces to ensure high code maintainability.
- Lead developer on an application that was granted the company-wide "Digital Transformation Award" in 2018.

Retail Manager, Apple – Pleasanton, CA, USA

April 2006 – April 2016

- Led a team of 30 employees to drive annual sales from \$15M to \$30M.
- Three-time Ovation Award winner for customer satisfaction in sales, training, and repairs.

Skills

Programming Languages: TypeScript, JavaScript, Python

Front-end Technologies: React Native, React.js, Redux, Angular, HTML5, CSS3, SASS, LESS

Back-end Technologies: Node.js, Express.js, GraphQL, REST APIs

Cloud Services & Databases: AWS (DynamoDB, Lambda, SQS, SNS), Redis, MongoDB

DevOps: Docker, Terraform, Jenkins, UNIX, Linux, Bash

Testing: Jest, Cypress, FullStory, Postman

Collaboration: Agile, Scrum, Jira, Figma, Git

AI Tools: Claude Code, Cursor

Education

Hack Reactor – Advanced Software Engineering Immersive Program

Dec 2016

California State University, East Bay – B.A. in Photography

May 2012

Languages

Native **English**
